

COMPREHENSIVE SOLUTIONS

for sanitization of industrial
equipment and
production facilities

in the Food Industry

INNOVATION LLC is the largest Russian manufacturer of professional-grade detergents and disinfectants, under its own brand: **GreenLAB**.

Over the years, day after day, thousands of professionals have used **GreenLAB** products to guarantee optimum cleaning results. **GreenLAB** products have a proven track-record in the hotel and cleaning sectors, in agriculture, housing and utilities, healthcare, and in the catering and food industries.

Striving to meet environmental safety needs is an important part of our professional calling. In our work, we follow these firm principles:

- Social Responsibility
- Respect for Natural Resources
- Product Responsibility: from development through end-user implementation

Social Responsibility and Respect for Natural Resources

European Quality at an affordable price

Our company is an active participant in the government import substitution programme.

GreenLAB products are a worthy analogue of expensive European brands at an affordable price that does not directly depend on the exchange rate.

Safe Production

Our production facilities are located in the industrial zone of the Leningrad Region, isolated from residential areas.

Our enterprise is equipped with modern treatment facilities in accordance with the requirements of Russian Building Norms and Regulations (SNIP 2.04.03-85).

Our facilities operate in careful compliance with all occupational health and safety regulations.

Hygiene and Environmental Safety

All our products are biodegradable and comply with the sanitary and hygiene norms established in the territory of the member states of the Eurasian Economic Union. Compliance information for our products is entered in the Registry of State Registration Certificates

SGR №RU.77.99.88.002.E.001938.07.20 SGR

Comprehensive solutions for sanitization of industrial equipment and production facilities

1 Innovative Detergent Formulations

GreenLAB products are complex, highly concentrated mixtures of chemicals whose synergistic action ensures that hygiene standards in the food industry are met at the lowest possible cost.

2 Optimized Assortment and Cleaning Programmes

Our specialized series of targeted-action detergents, cleaners, and disinfectants was developed taking into account the specifics of food production. Optimized cleaning programmes for each production area ensure maximum cleaning performance that is gentle on both the equipment and the environment.

3 Washing Process Automation and Technological Support

Your supply of **GreenLAB** detergents is accompanied by a range of additional services free of charge:

- installation of dosing equipment
- maintenance
- clear instructions for use
- staff training

With Respect for Your Work

Our many years of experience working with food businesses give us a deep understanding of all the challenges you face every day to provide what families need to gather around the table for breakfast, lunch and dinner.

The daily demand for varied and high-quality food products in a country of millions imposes a huge responsibility on representatives of all sectors involved in the food industry. With our food hygiene products, we are proud to contribute to the prosperity of this most important industry.

By working together to implement the latest technology in cleaning processes, we promote the sustainable use of natural resources, preserving their amazing wealth for our children and for generations to come.

We Are Always Glad to Welcome New Partners!

Companies interested in the following competitive business advantages offered by **GreenLAB** products are welcome to join us:

- perfect cleaning efficiency with minimal use of detergent
- reduced labour and time costs
- conservation of water and energy
